

— Virtual Safety Manager

YOUR DEDICATED RESOURCE

Using Sedgwick training resources and the Vector Solutions Learning Management System, the CHWCA Virtual Safety Manager (VSM) Program is designed to:

- Help you keep your records for online and onsite training – all in one place and accessible whenever you need them
- Keep track and monitor employee credentials, certifications, and licenses and alert employees for renewals
- Distribute policies and programs and record employee acknowledgements

Best of all, CHWCA offers the service at no cost to members.

Wouldn't you like some help with managing training, recordkeeping, and renewals? The program is flexible and can be customized to fit your needs. Here are some of the ways CHWCA members are using the program:

Assigning online training handouts directly to employees

Documenting tailgate meetings

Monitoring CPR certification renewals

Assigning California state-required courses (e.g. SB 1343 anti-harassment training)

Documenting onsite training

Tracking monthly AED inspections
